

COP 26 – What does it mean for community energy?

Webinar, Thursday 18th November, 10am-12pm

Register [here](#)

COP 26 is taking place from 31st October – 19th November and will hopefully result in a ratcheting up of global commitments to limit global warming to within 1.5°C.

This event is being held in partnership between Electricity North West and the North West Local Energy Hub to provide an update on the policies announcements expected as a result of COP and what they will mean for community and local energy projects.

It will also provide practical examples of what communities can do now to take their own actions towards net-zero.

Agenda

10.00 Welcome and introduction, Kate Gilmartin

10.15 From rhetoric to practical action, Duncan Law, Policy Manager, Community Energy England

10.35 Q&A

Session 2 – What can communities do now to move towards net-zero?

10.45 Introduction, Helen Seagrave, Electricity North West

10.50 Molly Hogg, CAfS – the carbon foot printing and solar modelling tool for communities

11.05 Jonathan Atkinson, Carbon Coop – Community Heat Pump training

11.20 Kate Gilmartin - Chipping low carbon heat - a village scale approach to low carbon heat

11.35 Susan, JIJ Community CIC – Community owned EV car club

11.35 Q&A and discussion – how can you implement these ideas in your community? What barriers to do need to help to overcome?

12.00 Formal close with the option of staying on the call for networking

12.00 – 12.30 Networking in small groups, three x 10 mins
